Thin Solid Films, *201* (1991) 405–408

Contents of Volume 201

Issue 1

Letters

Fabrication of low resistive CdS thin films L1
A. L. Dawar, P. K. Shishodia, G. Chauhan (Delhi, India), A. Kumar (New Delhi, India) and P. C. Mathur (Delhi, India)

Preparation and characterization studies of submicropores in MnO_2 semiconductor films L7
B. Bayrachny, P. Cheremskoy, V. Gomozov, L. Murovzev and L. Skatkov (Kharkov, U.S.S.R.)

Electronics and Optics

Electrical conductivity of plasma-sprayed titanium oxide (rutile) coatings 1
A. Ohmori, K.-C. Park (Osaka, Japan,), M. Inuzuka (Kawasaki, Japan), Y. Irata, K. Inoue and N. Iwamoto (Osaka, Japan)

Improved surface plasmon enhanced photodetection at an Au–GaAs Schottky junction using a novel molecular beam epitaxy grown Otto coupling structure 9
C. Daboo, M. J. Baird, H. P. Hughes (Cambridge, U.K.), N. Apsley and M. T. Emeny (Great Malvern, U.K.)

Current *vs.* voltage characteristics of ion-beam-grown polymer–metal granular thin films 29
P. Bruschi and A. Nannini (Pisa, Italy)

Metallurgical and Protective Layers

Frictional properties and micro-characteristics of N_2^+-implanted Fe–Cr alloys with various chromium contents 39
J. Sasaki (Kanagawa, Japan) and M. Iwaki (Saitama, Japan)

The effect of hydrochloric acid pretreatments on 440C steel surface composition and the adhesion and endurance of sputter-deposited MoS_2 solid lubricant films 49
M. R. Hilton, R. Bauer, S. V. Didziulis and P. D. Fleischauer (El Segundo, CA, U.S.A.)

New approach to the strain relaxation mechanism in lattice-mismatched epitaxy 59
H. Tatsuoka, H. Kuwabara, Y. Nakanishi and H. Fujiyasu (Hamamatsu, Japan)

Stress behaviour of magnetron-sputtered SiC thin films on thermal cycling and annealing 69
J.-H. Jou, L. Hsu, S. Yeh (Hsin Chu, Taiwan) and T. Shyy (Taipei, Taiwan)

Bending tests to estimate the through-thickness strength and interfacial shear strength in coated systems 81
P. M. Ramsey, H. W. Chandler and T. F. Page (Newcastle upon Tyne, U.K.)

Preparation and Characterization

Growth of semiconducting ternary thin films of $AgSbTe_2$ 91
D. Lakshminarayana (Gujarat, India)

Fundamentals of sol–gel dip coating 97
C. J. Brinker, G. C. Frye, A. J. Hurd and C. S. Ashley (Albuquerque, NM, U.S.A.)

Process characterization with d.c. magnetron sputtering of Cr–Si–C thin films in Ar–CH_4 mixtures 109
G. Sobe, A. Neelmeijer, G. Weise and A. Heinrich (Dresden, F.R.G.)

A transmission electron microscopy study on sputtered Zr–B and Zr–B–N films 123
E. Brandstetter, C. Mitterer and R. Ebner (Leoben, Austria)

Thin vapour-deposited niobium pentoxide films 137
J. J. van Glabbeek and R. E. van de Leest (Eindhoven, The Netherlands)

Characterization of niobium nitride thin films prepared by ion-assisted deposition 147
A. Cavalleri, F. Giacomozzi, L. Guzman, F. Marchetti and P. M. Ossi (Trento, Italy)

Mo–Si multilayered films for soft X-ray mirrors 155
K. Sakaue, Y. Nishihata, Y. Kawasaki, N. Sano and H. Terauchi (Nishinomiya, Japan)

The adhesion of low pressure chemically vapour deposited tungsten films on silicon and SiO_2 for SiH_4–H_2–WF_6 and H_2–WF_6 processes 167
Y. W. Park (Seoul, South Korea), C. O. Park (Taejon, South Korea) and J. S. Chun (Seoul, South Korea)

Langmuir–Blodgett and Related Films

Visualization of two-dimensional crystal growth in a monolayer of stearic acid on the electron microscopic scale 175
K. Iriyama, T. Araki, N. Shimada, M. Iwamoto, T. Sasaki and M. Atsuzawa (Tokyo, Japan)

Magnetic orientation of phthalocyaninato-polysiloxanes 187
Z. Ali-Adib, K. Davidson, H. Nooshin and R. H. Tredgold (Lancaster, U.K.)

Condensed Matter Film Behaviour

Thermal behaviour and structure of gelatin layers with embedded liquid crystals 197
A. Seeboth, H. Hermel and G. Kretzschmar (Berlin, F.R.G.)

Issue 2

Electronics and Optics

Electrical breakdown and electronic current of tantalum–tantalum oxide–aqueous electrolyte systems 203
K. C. Kalra and P. Katyal (Rohtak, India)

Calcul des indices de réfraction complexe de l'oxyde inhomogène WO_3 tétragonal par spectrométrie d'émission IR 217
P. Pigeat, N. Pacia et B. Weber (Nancy, France)

Direct and indirect transitions in copper telluride thin films 231
B. S. Farag and S. A. Khodier (Cairo, Egypt)

Metallurgical and Protective Layers

Quantitative characterization of the structure of plasma-sprayed Al_2O_3 coating by using copper electroplating 241
A. Ohmori and C.-J. Li (Osaka, Japan)

An analysis of thermal stresses in a multilayer thin film printhead 253
J. H. Jou and L. Hsu (Hsinchu, Taiwan) and L. S. Chang (San Jose, CA, U.S.A.)

Preparation and Characterization

Growth of ultrathin films of copper onto α-Al_2O_3 (0001): mechanism and epitaxy 267
P. J. Møller and Q.-L. Guo (Copenhagen, Denmark)

Physical properties of evaporated PbF_2 optical films 281
H.-J. Kühn, A. Duparré, W. Richter, A. Lehmann and U. Bergner (Jena, F.R.G.)

Large area piezoelectric ZnO film transducers produced by r.f. diode sputtering 293
Th. Aeugle, H. Bialas, K. Heneka and W. Pleyer (Ulm, F.R.G.)

The structure and electrochemical modification of electrolytic alloys of nickel and cobalt with phosphorus for electrocatalytic purposes 305
A. Budniok and P. Matyja (Bankowa, Poland)

Study of interface roughness and crystallographic structure of Au/Co/Au sandwiches 317
C. Marlière, D. Renard and J. P. Chauvineau (Orsay, France)

Deposition of TiO_2 thin films by plasma-enhanced decomposition of tetraisopropyltitanate 327
H. J. Frenck, W. Kulisch, M. Kuhr and R. Kassing (Kassel, F.R.G.)

Non-crystalline chromium, molybdenum and tungsten phosphate films prepared by metal organic chemical vapour deposition 337
I. M. Watson and J. A. Connor (Canterbury, U.K.) and R. Whyman (Runcorn, U.K.)

Langmuir–Blodgett and Related Films

Two-dimensional ordered stearic acid films on $Cd_xHg_{1-x}Te$ (111) substrates 349
B. A. Nesterenko, V. V. Milenin, O. Yu. Gorkun, A. A. Stadnik, Z. I. Kazantseva and A. V. Nabok (Kiev, U.S.S.R.)

Condensed Matter Film Behaviour

Study of the $CuInSe_2$/Mo thin film contact stability 361
S. Raud and M.-A. Nicolet (Pasadena, CA, U.S.A.)

Adsorption of xenon atoms on metal surfaces 373
S. Ishi (Tomakomai, Japan) and B. Viswanathan (Madras, India)

Author Index 403
